## EDUCATION

### Georgia State University

Masters of Science in Computer Science | 3.8 GPA

Expected Graduation: May 2025

RELEVANT COURSEWORK: Software Engineering, Deep Learning, Operating systems, OOP, DBMS, Cloud Computing

### University of Mumbai

Bachelor of Engineering in Computer Engineering | 3.5 GPA

August 2018 - June 2022

## PROFESSIONAL EXPERIENCE

### Software Engineer Mentee | The Linux Foundation (RISC-V)

September 2024 – December 2024

- Collaborated on RISC-V, an open-standard ISA, under the Linux Foundation's prestigious mentorship program.
- Refactored a critical parser for modularity, isolating output into dedicated scripts, boosting scalability by 30%.
- Designed and executed 20+ unit tests, streamlining debugging processes and raising code reliability by 25%.
- Created YAML and JSON GitHub workflows to automate tests and integrations, facilitating seamless updates.
- Enhanced the RISC-V Sail Model repository with LaTeX/AsciiDoc documentation generation, type-checking, and executable emulator support achieving 300 KIPS performance on Intel i7-7700.

### Full Stack Developer Intern | All in Dating Inc

May 2024 – August 2024

- Engineered a Flutter dating app with WebSockets, reducing message delivery time by 30% for instant connections
- Conducted API testing with Postman and optimized SQL databases to efficiently manage over 10,000 user records
- Revamped system design to cut chat refresh costs, improving system speed and reducing resource usage by 50%
- Implemented an AI chat assistant using LLaMA-1 to enrich user experience with engaging conversation starters
- Analyzed web options and chose Azure Media Storage for efficient sharing of multimedia content

### Senior Data Engineer | LTIMindtree

June 2022 – July 2023

- Migrated a client app from Oracle SQL to Azure Databricks, optimizing 10+ critical services and modules
- Formulated Git workflows to process 5TB of sales data across 100 regions and 80 product categories
- Integrated Snowflake with SAP for real-time updates, boosting data-driven decisions and cutting costs by 20%
- Used Azure Data Factory to transition 2TB of data from monolith to microservices while preserving BU logic
- Employed ADF for data validation and transformation, achieving 99% accuracy in data synchronization

### Mobile App Developer Intern | Codes & Coffee Tech

February 2022 – May 2022

- Constructed an online inventory app view using Flutter to manage front-end features and functionality.
- Built backend APIs using Dart and NodeJS, ensuring smooth communication and data flow in the system by leveraging asynchronous programming techniques
- Deployed the app on the Google Play Store, reaching over 100 vendors and reducing inventory losses by up to 20%
- Implemented caching mechanisms for cost savings and used GraphQL to reduce API requests by almost 45%

## PROJECTS

### AI-Enhanced Game Development with Unity

December 2024

- Integrated AI language models in Unity for real-time NPC dialogue based on player inputs and game events.
- Leveraged Microsoft Autogen to implement human-in-the-loop and multi-agent models for NPC behavior.
- Incorporated environment-aware modular dialogue generation to enhance gameplay immersion and adaptability.

### ALPFA Atlanta Job-Matching Platform ([github.com/TraXIcon/ALPFAteam3](https://github.com/TraXIcon/ALPFAteam3))

September 2024

- Won 1st place at the Code-to-Give Hackathon by Morgan Stanley, competing against 50+ teams
- Developed a Django job-matching platform leveraging SpaCy for profile parsing, boosting match accuracy by 20%
- Created GPT-4/Langchain tool for sponsors to evaluate 100+ resumes in parallel, reducing review time by 30%
- Configured a React frontend with Tailwind, enhancing user engagement by 25% and driving user retention

### Smart AI Accessibility for Google Meet ([github.com/TraXIcon/SIHCODEFINAL](https://github.com/TraXIcon/SIHCODEFINAL))

September 2022

- Secured 1st place among 30,000+ teams in the Smart India Hackathon 2022 by developing innovative assistive tech
- Led the development of a JS-based Chrome extension, enhancing accessibility for over 1,000 users with disabilities
- Integrated AI with MediaPipe and deep learning, achieving over 90% accuracy in real-time communication
- Optimized server CPU usage by 40% through late initialization and optimizing scripts into efficient HTTP services

## SKILLS AND CERTIFICATIONS

**Languages: Proficient:** Python, TypeScript, Javascript **Intermediate:** SQL, Golang, C++ **Beginner:** Java, Ruby

**Technologies:** AWS, Langchain, Azure, Git/Github, CI/CD, Docker, Kubernetes, Flutter, MongoDB, Redis, Django

**Certifications:** Certified AZ-900 (Microsoft Azure Fundamentals)
